

Project Summary Information

Date of Document Preparation: April 3, 2020	
Project Name	Emergency Assistance to China Public Health Infrastructure Project
Document Code	PD000367-PSI-CHN
Country	People's Republic of China
Sector/Subsector	Other Infrastructure/Public Health Infrastructure
Status of Financing	Approved
Project Description	<p>The Project will have two parts:</p> <p>Part 1: Strengthening of public health emergency response capacity in Chongqing:</p> <ul style="list-style-type: none"> - Component 1.1: systematic upgrading of the Centers for Disease Control and Prevention (CDCs) at all administrative levels and the treatment capacity of medical institutions in dealing with epidemic emergencies. - Component 1.2: providing emergency equipment and supplies to help contain the outbreak of COVID-19 in Chongqing. <p>Part 2: Strengthening of public health emergency response capacity in Beijing:</p> <ul style="list-style-type: none"> - Component 2.1: capacity enhancement of the municipal-level CDC and the treatment capacity of municipal hospitals in dealing with epidemic emergencies - Component 2.2: providing emergency equipment and supplies to help contain the outbreak of COVID-19 in Beijing.
Objective	To strengthen the public health emergency response infrastructure in Chongqing and Beijing through the upgrading of public health infrastructure and the provision of emergency equipment and supplies.
Expected Results	<ul style="list-style-type: none"> i) Number of CDCs that have completed upgrading during the Project period (for Chongqing); ii) Number of public health and medical workforce receiving training under the Project (for Chongqing); iii) Increasing capacity (in terms of number of the beds) for medical treatment of infected patients (for Beijing); iv) Establishment of a unified Emergency Dispatch and Command Information System at municipal level (for

	Beijing).																												
Environmental and Social Category	Category B																												
Environmental and Social Information	<p>The Bank's Environmental and Social Policy (ESP) is applicable to the proposed Project, which has been placed in Category B based on a virtual review of the proposed Project activities described in Component 1.2 and Component 2.1, including equipment installation, interior improvements and upgrading of laboratories, existing wards and facilities for receiving infected patients and providing medical treatment in several designated hospitals in Chongqing and Beijing. Given the emergency nature of this Project, a phased approach for addressing environmental and social (ES) risks and impacts, permitted under the ESP for Situations of Urgent Need of Assistance, has been adopted.</p> <p>In the case of equipment installation, interior improvements or upgrading of laboratories, wards and facilities in the designated hospitals, it is expected that majority of activities would be completed in March and by the end of December 2020 in Beijing and Chongqing, respectively. Therefore, an environmental and social audit (ES Audit) is planned to be used as the ES instrument. Under the phased approach, the ES Audit may be deferred to the Project implementation phase. Consequently, the Bank may approve the Project prior to the preparation of the ES Audit and the Bank's field-based ES due diligence.</p> <p>The ES Audit will include collection and review of national governmental laws and regulations on environmental management of medical facilities and hospital construction and operation, medical waste disposal and management, hospital wastewater treatment and management, as well as site inspection and the audit of the related ES performance conducted by the contractors in the course of equipment installation, interior improvements or upgrading of laboratories, wards and facilities in the designated hospitals. The ES Audit will serve as the basis for any corrective or mitigation measures that may need to be undertaken by the borrower. The ES Audit process will check if there are any grievances that need to be addressed from Project supported activities and recommend actions for their resolution.</p>
