It would be a large and prestigious long-term road infrastructure development program which in addition to State funded works, would also include several Externally Aided Projects (EAP) under its umbrella. The works under Asom Mala would involve big highway contracts with substantial land acquisition. Gender Action Plan

Gender Action Plan

The Gender Action Plan covers two segments of women: one, the women workforce employed in the construction work and second, the local women and girls living in the villages located in the vicinity of the project. Regarding the first, there are various constitutional and legal provisions for gender equality and women's empowerment, some of which are listed below:

Equal Remuneration Act, 1973 provides for payment of equal remuneration to men and womenworkers for the same work of similar nature without any discrimination. To ensure social security to the workers including women in the unorganized sector, the Government has enactedthe Unorganized Workers' Social Security Act 2008.

The Maternity Benefit Act, 1961 and **The Maternity Benefit (Amendment) Act, 2017** regulateemployment of women in certain establishments for a certain period (26 weeks) before and afterchildbirth and provides for maternity and other benefits.

The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act (POSH), 2013

The Vishakha Guidelines were a set of procedural guidelines for use in India in cases of sexual harassment. They were promulgated by the Indian Supreme Court in 1997 and were superseded in 2013 by the Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013, which covers all women, irrespective of their age or employment status and protect them against sexual harassment at all workplaces both in public and private sector, whether organized or unorganized.

Sexual harassment includes such unwelcome sexually determined behavior (whether directly or by implication) as a) physical contact and advances; b) a demand or request for sexual favors; c) sexually colored remarks; d) showing pornography; e) any other unwelcome physical verbal or non-verbal conduct of sexual nature.

Where any of these acts is committed in circumstances where the victim has a reasonable apprehension that in relation to the victim's employment or work whether she is drawing salary, or honorarium or voluntary, whether in government, public or private enterprise such conduct can be humiliating and may constitute a health and safety problem.

In addition to ensuring compliance with the other provisions stipulated, the Sexual Harassment Act casts certain obligations upon the employer to, inter-alia,

- ▶ provide a safe working environment
- ▶ display conspicuously at the workplace, the penal consequences of indulging in acts that may constitute sexual harassment and the composition of the Internal Complaints Committee
- ▶ organize workshops and awareness programmes at regular intervals for sensitizing employees on the issues and implications of workplace sexual harassment and organizing orientation programmes for members of the Internal Complaints Committee
- ▶ treat sexual harassment as a misconduct under the service rules and initiate action for misconduct.

- ▶ The employer is also required to monitor the timely submission of reports by the Internal Complaints Committee.

Women in Construction Activities

The construction contractor will set up their construction camps on identified locations where labor force required for the construction activities will be provided with temporary residential accommodation and other necessary infrastructure facilities. The labor force required for the construction activities will mostly be of semi-skilled and high-skilled categories. In addition, there will be requirement of unskilled labor where women will certainly contribute. Apart from this, women as family members of the skilled and semi-skilled laborers may also stay in the construction camps and will be indirectly involved during the construction phase. The families of labor will include their children also. Foreseeing the involvement of women both directly and indirectly in the construction activities, certain measures are required to be taken towards welfare and wellbeing of women and children in particular during the construction phase.

Specific Provision for Women in the labour Camps

It needs to be pointed out that females along with the male members of the family may be engaged in the construction work and stay in temporary construction camps. They are likely to face many adverse conditions and realizing this, several welfare provisions mentioned under this section have been planned directed to cover all the women and children living in the construction camp.

Temporary Housing

During the construction work phase, the families of laborers/workers should be provided with residential accommodation suitable to nuclear families.

Health Centre

Health problems of the workers should be taken care of by providing basic health-care' facilities through health centers temporarily set up for the construction camp. The health center should have at least a visiting doctor, nurses, general duty staff, free medicines and minimum medical facilities to tackle first-aid requirements or minor accidental cases, linkage with nearest higher order hospital to refer patients of major illnesses and critical cases. Apart from this, the health center should be provided with regular vaccinations required for children.

Day Crèche Facilities

It is expected that among the women workers there will be mothers with infants and small children. Provision of a day crèche may solve the problems of such women who can leave behind their children in such crèche and work for the day in the construction activities. The crèche should be provided with at least a trained worker to look after the children. The worker, preferably women, may take care of the children in a better way. In cases of emergency, she, being trained, can tackle the health problems of the children and can organize treatment linking the nearest health center.

Proper Scheduling of Construction Works

Owing to the demand of a fast construction work it is expected that a 24 hours long work schedule would be in operation. Women should be exempted from night shifts works as far as possible.

Education Facilities for children

The construction workers are mainly mobile groups of people. They are found to move from one place to another taking along their families with them necessitating the need for educating their children at the place of their work. For this at least primary schools are required to be planned near the construction camps. Wherever feasible, day crèche facilities could be extended with primary educational facilities. Alternatively, evening classes can be arranged for these children in the local schools.

Women in the villages in the project area

There is likelihood of Sexual Harassment of women and instances of Gender Based Violence due to the influx of the large number of outsiders, construction labour who will be staying in the area for the entire duration of construction and the drivers, cleaners and a host of transporters and petty traders who will be frequenting the area. A proper code of conduct for the resident work force and guidelines for the visitors will be put in place to deter them from any unwarranted behavior towards local women and girls.

The POSH/PASH of the project proponent will be prominently displayed at the labor camps and work sites. Section on GBV and the salient features of PASH/POSH will also be included in the orientation training modules for the labour and staff. At the time of joining, the staff and labour will have to sign the Code of Conduct and give to the HR department for filing.

Gender Based Violence

GBV is any harmful act that is perpetrated against a person's will and that is based on socially-ascribed gender-related differences between people. It includes acts that inflict physical, sexual or mental harm or suffering, threats of such acts, coercion, and other deprivations of liberty. These acts can occur in public or in private.

Sexual exploitation and abuse (SEA) is any actual or attempted abuse of a position of vulnerability, differential power, or trust, for sexual purposes, including, but not limited to, profiting monetarily, socially or politically from the sexual exploitation of another. Project beneficiaries and members of project-affected communities, especially women, may experience SEA. Sexual harassment (SH) includes unwelcome sexual advances, requests for sexual favors, and other unwanted verbal or physical conduct of a sexual nature. SH may occur between personnel/staff working on the Project.

The Activity Plan defines Gender-Based Violence (GBV), describes the mechanism available to address such incidents, assesses the project scenario and potential risks for GBV and develops a plan for building capacity and increasing awareness amongst workers, laborers regarding socially/culturally appropriate behavior that would ensure that the project community and women in particular are safe, secured, and not vulnerable to abuse.

Table 7: Sample GBV Prevention Action Plan

Awareness generation	<ul style="list-style-type: none"> ▶ Distribution of leaflets propagating gender-appropriate behaviour ▶ Signing of self-declaration format on commitment towards gender-sensitive behaviour 	

Special Measures for Controlling STD and AIDS

Solitary adult males usually dominate the labor force of construction camps. They play a significant role in spreading sexually transmitted diseases. In the construction camps as well as in the neighboring areas they are found to indulge in physical relations with different women. This unhealthy sexual behavior gives rise to STDs and AIDS. While it is difficult to stop such activities, it is wise to make provisions for means of controlling the spread of such diseases. Awareness camps for the target people, both in the construction camp and neighboring may help to a large extent in this respect for controlling the deadly disease.

Gender Monitoring Indicators

Following indicators would be used to adequately monitoring the Gender and Accountability Action Plan:

- Number of women employed as a percentage of total persons employed in construction activities.
- Number of women workers earning same wage as men workers, as a percentage of total womenworkers employed in construction activities.
- Availability of basic amenities and separate toilet at campsite.

- Constitution of “GRC” at site to register cases of sexual harassment.
- Number of CoCs signed vis-a-vis number of labour and staff.
- Addition of salient features of PASH/POSH in the TBT.

Appointment of Special Officer

An officer shall be inducted as GAAP officer and shall be responsible for the implementation of the GAAP, SMP and EMP along with grievance redressal. The Environment and Social Expert of the External Monitoring Consultant can be nominated as the GRO. He should maintain all records related to Actions taken under the Gender Action and Accountability Plan, grievances received, and decisions taken in the meetings of the GRC and also act as the coordinator between the different agencies involved in the implementation of the project.
